CODE ENFORCEMENT DEPARTMENT

Street Excavation

Seaside Heights, Chapter 203 Streets and Sidewalks; Article III Street Excavations.

§ 203-16.: Permits not to be issued on streets improved within 5 years.

No permit shall be issued by the Code Enforcement Officer to any person which would allow an excavation or opening in a street surface which was paved or improved less than five years prior to the date of application. Unless an emergency condition exists, or the application can demonstrate through documentation a significant personal hardship.

With the understanding of the above, and proof of an exception, please acknowledge the following:

I understand and agree to the responsibility for the repaving of the street which has been improved within the last 5 years by the Borough of Seaside Heights. I agree that the method of repaving will be from curb to curb, the entire width of the street. I am aware that the release of a permit will be contingent upon this agreement, and I will not receive a Certificate of Occupancy without proper inspection approvals.
